

## The Future Of Battery Technology... Starts Here.

**LION Smart GmbH** is an innovative provider of intelligent energy storage solutions and is driving the energy transition forward with scalable Battery Energy Storage Systems (BESS). Our focus is on high-performance, container-based large-scale storage systems for industry, grid operators, and project developers.

We are looking for an experienced **Technical Application Engineer (m/f/d) – Battery Storage Projects** who will be responsible for strategically and operationally expanding our BESS container business.

### **Technical Application Engineer (m/f/d) – Battery Storage Projects**

#### **What we expect:**

- Technical consulting and support in acquiring new customers, project acquisition, and implementation
- Development of concepts and proposals for MW-scale storage solutions
- Analysis of customer requirements and development of optimal system solutions
- Close collaboration with sales, development, and project management
- Support during customer meetings, presentations, and commissioning

#### **Who we are looking for:**

- Completed degree in Electrical Engineering, Energy Technology, or a comparable field
- Initial experience with battery storage systems, power electronics, or energy management systems is an advantage
- Technical understanding and enthusiasm for explaining complex topics in an understandable way
- Analytical, structured working style and strong communication skills
- Openness to occasional travel and international customer and supplier contacts
- Willingness to travel

#### **Your benefits:**

- Exciting projects with visible impact on the future of energy
- Excellent development opportunities in a future-oriented industry
- Short decision-making paths and a collegial working environment
- Attractive salary for work that is enjoyable
- Company pension scheme
- Company health insurance
- 30 days of vacation, flexible hours, and remote work for a good work-life balance
- Ergonomic workstations
- Free parking
- Individual training opportunities
- Employee events and good transport connections

Send us your CV and references and we will get in touch with you!
